Prompt to SCREEN

a sneak peek inside

The course behind every Addi episode.

Here's what's in it, how it works, and how easy it is to follow.

how it works

From an idea to a finished reel in four steps

1 The story

Tell the Idea Builder what you want. It gives you a full mini movie: setup, twist and dialogue.

2 The characters

The Midjourney Builder writes the prompts for your lead, the love interest and the scene stills.

3 The video

The Seedance Builder writes the video prompt. You paste it into Higgsfield (or whichever AI video platform you use) with your stills and generate.

4 Edit and post

Trim it, add it to Instagram, done. The course shows you exactly how.

the secret sauce

Three prompt builders do the hard part

You describe your idea in plain English. They write the prompts for you. No prompt skills needed.

Mini Movie Idea Builder

Gives you the story: the premise, the beats and the dialogue.

Midjourney Prompt Builder

Writes the prompts for your characters and movie stills.

Seedance Prompt Builder

Turns your scene into a full video prompt, beat by beat.

what's inside

13 modules, start to finish

1 The two AI platforms you'll use

2 Instagram setup and warm-up (20 short steps)

3 Your Midjourney moodboard

4 Setting up the prompt builders

5 The Mini Movie Idea Builder

6 Sparkly dress tutorial

7 The full video creation workflow

8 Editing and posting

9 AI camera movements

10 14 of her own mini movie prompts

11 Affiliate terms

12 Your affiliate setup + student results

13 You're ready

plus

14 complete mini movie prompts, ready to use

Full stills and video prompts for her own reels, including Christmas rom-coms. Swap in your character and generate.

Two of my early episodes and all four Christmas specials started as these.

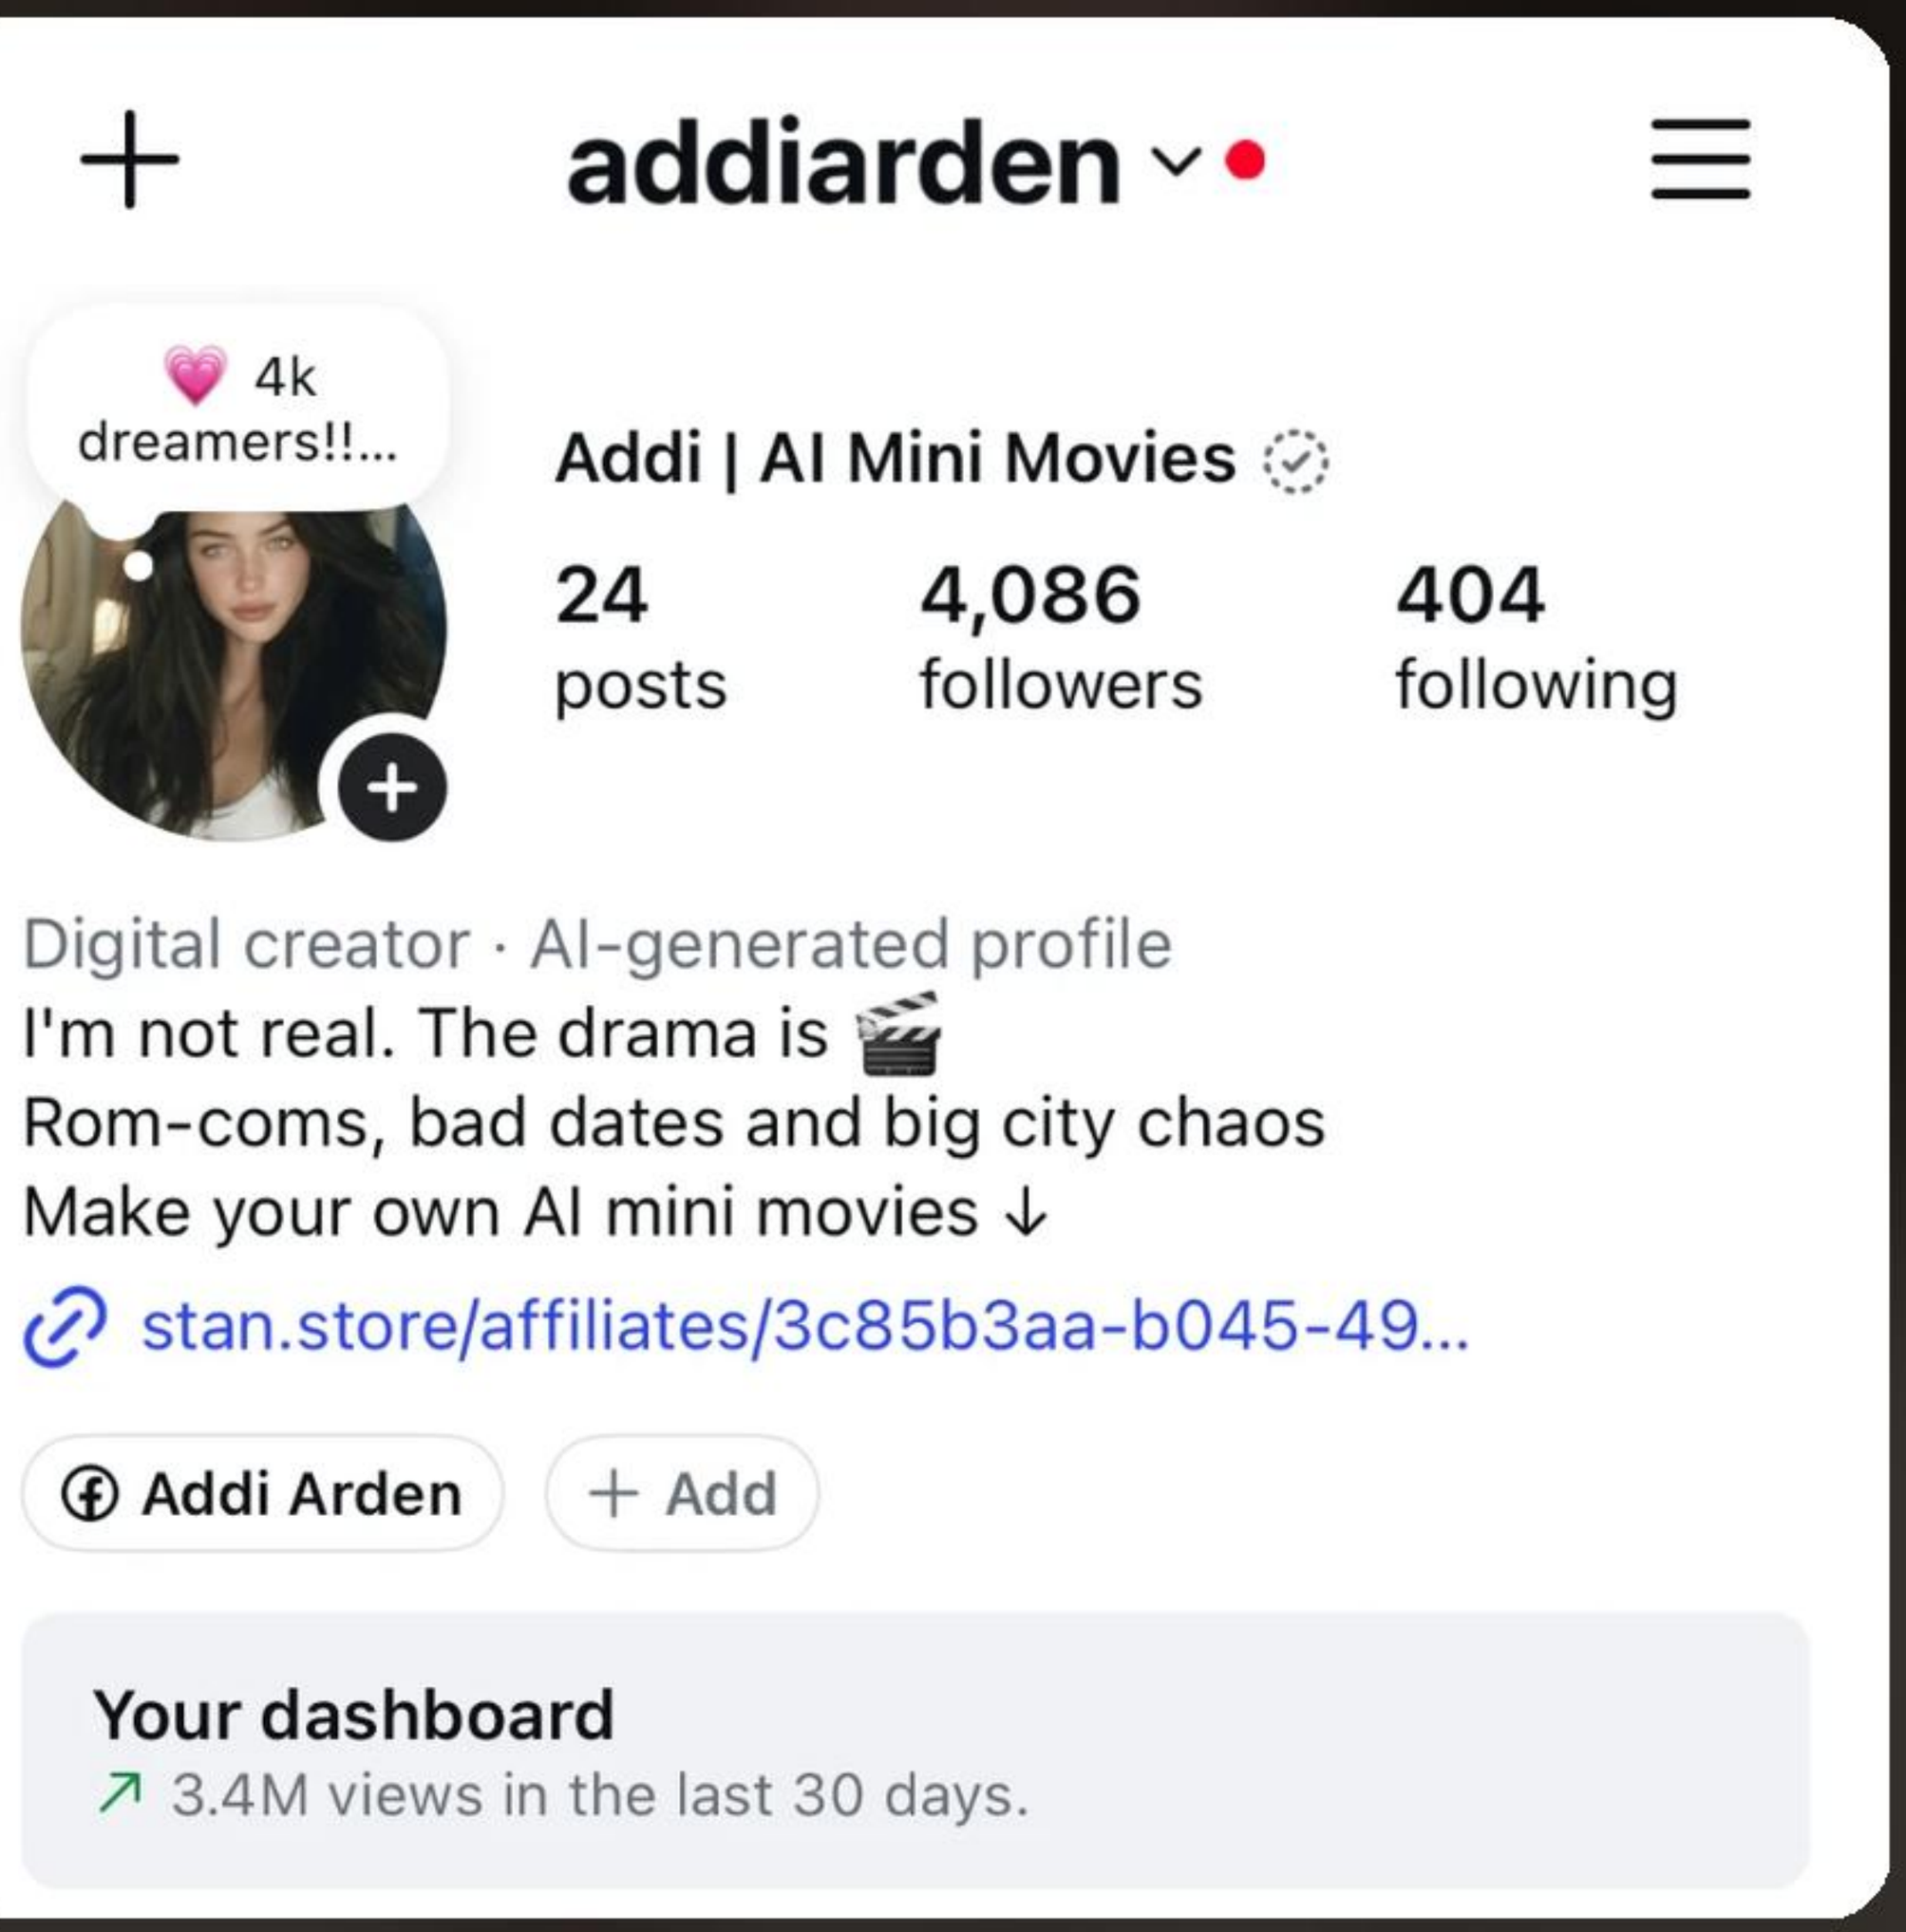
is it hard?

Honestly, no. If you can copy and paste, you can do this.

- Two tools: Midjourney (the lowest-tier plan is all you need for the dreamy 90s look) and Higgsfield, or whichever AI video platform you use.
- Short video lessons you can follow along with.
- Step-by-step Instagram setup, day by day.
- The builders write every prompt for you.
- Ready-made prompts if you're stuck for ideas.

what I've made with it

Addi started on 19 Oct. This was 10 days later.



Every reel on the page was made with this course. Results vary, of course: it's down to the stories you make and how often you post.
